**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, 23 and 24 drawn to switching or routing, classified in class 455, subclass 428.
  - II. Claims 18-22, drawn to service quality, classified in class 455, subclass 452.2.
  - III. Claims 25-30, drawn to alternative routing, classified in class 455, subclass 445.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as *providing mobile communication service based on different rate structures* and invention III has separate utility such as *coupling to a plurality of wireline telephone extensions independently and capable of independent coupling to a plurality of mobile telephones associated with at least one mobile network*. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2686

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
